PROBLEM

Businesses recruit slowly and search in the same pool. The time to hire often takes too long and is often to the detriment of the business.

What if a machine could help SME's hire smarter and faster, by searching through 34 million people, in seconds?

SOLUTION

Meet **Crystal**! An AI Recruitment Machine that helps business' hire smarter and faster. She finds talent by reviewing 34 million people and determining which 10 people would suit that 1 job description! Saving you time and money.

Her talent is finding yours

WHY NOW

- ◆ Recruitment industry is ripe for new technology
- ◆ A revolution is needed on matching people to the right job.
- ◆ Critical nature of speeding up the process of hiring

Some TESTIMONIALS

“Crystal is a great team member to have on your team! She managed to find me several suitable candidates in a single afternoon which saved me a lot of time and effort. I would recommend Crystal to teams who are looking for an extra pair of hands without the pain of having to manage another staff member. Well done to the Team at Job Crystal for developing such an innovative and dynamic tool that is ripe for the South African, and international market!”

Vanessa Raath

Vanessa Raath
THE TALENT HUNTER

“As Jim Collins author of Good to Great would say "have the right people on the right seats on your bus - that is the key to take a business from Good to Great!) What my dear friend Jim never realised was the time, error, time, error, did I mention time? Crystal is what ANY BUSINESS big or small was waiting for.

It is so simple - you sign in, post a job (they even have templates you can use!!!) and the next thing you see is 10 suitable candidates to choose from to arrange the interview. When going through my candidates selected by Crystal the only hard work was deciding which of them to interview as all of them were great.

All of this in less than a sip of tea. We hired and our candidate is the PERFECT match! Thank you Crystal!”
